

CHN Quality - Quality Performance Advocacy and Support

The Catalyst Performance Advocate team provides ongoing quality performance visibility to participants of Catalyst Health Network by providing practice and NPI-level **Quality Performance Reporting** along with **Patient Care Gap Opportunity Reporting**. This Quality Reporting is maintained and updated by the Catalyst Health Group Data Management department and is sourced from claims data reported to insurance companies on behalf of the patients assigned to Network Participants. Network Participants are encouraged to review the prepared quality reporting for quality improvement opportunity through patient engagement and clinical or administrative workflow implementation. Top performing network participants routinely complete patient outreach initiatives to schedule wellness appointments and implement standardized order-sets for routine screenings and lab testing.

In the event Catalyst Health Network Participants notice discrepancy in the Quality Performance Reporting, practice team members may report supplemental data to the Catalyst team to ingest as supplemental quality data using the structured data workbooks listed below.

Quality Supplemental Data Workbooks & Process	
Adult Medicine Practices	2024 CHN Commercial Quality Supplemental Data Submission Workbook & Instructions (Adult Version).xlsx
Pediatric Practices	2024 CHN Commercial Quality Supplemental Data Submission Workbook - Pediatric Version.xlsx
<p>Note: Catalyst can only accept supplemental quality data from Catalyst Health Network Participants when it is submitted using the Supplemental Data Submission Workbook process. If necessary, contact your Performance Advocate or Performance@catalysthealthgroup.net for more information about completing this workbook.</p>	

Quality Measure Education

On an annual basis, Catalyst publishes and distributes an updated [Detailed Quality Reference Guide](#) which includes detail specific to each of the quality measures Catalyst Health Network aims to achieve high performance in. The Quality Measures included in the [Detailed Quality Reference Guide](#) utilize [HEDIS](#) guidelines and recommendations. In addition to the [Detailed Quality Reference Guide](#), Network Participants can utilize Pocket Quality Reference cards (see examples below) to promote education of focused quality measures within their practice. These quality resources can be provided by your assigned Performance Advocate or upon request by contacting performance@catalysthealthgroup.net.

Quality Measures Applicable to Network Participants	
Breast Cancer Screening	Cervical Cancer Screening
Colorectal Cancer Screening	Chlamydia Screening in women
Diabetes: Retinal Eye Exam	Diabetes: Hemoglobin A1c testing
Diabetes: Kidney Health Evaluation	Controlling High Blood Pressure
Childhood Immunization Status: Combo 2	Childhood Immunization Status: Combo 3
Childhood Immunization Status: Combo 10	Well Child Visits in the first 30 months of life
Child and Adolescent Well-Care Visits 3-21 years	Coronary Artery Disease (CAD): Patients currently taking a statin
Statin Therapy for patients with cardiovascular disease	Diabetes: Patients compliant with prescribed statin-containing medications
Asthma medication ratio	Persistence of beta-blocker treatment after heart attack
Use of opioids at high dosage	Appropriate testing for pharyngitis
Appropriate treatment for upper respiratory infection (URI)	Avoid antibiotics for acute bronchitis/bronchiolitis
Imaging in uncomplicated low back pain	Plan all-cause readmissions (actual to expected)
Depression Screening	

Adult Quality Reference Card:

Has the patient completed an Annual Wellness appointment?

For Diabetic Patients

- A1c in control: < 8% (annually) + CPTII
- KED: Urine Albumin Creatinine Ratio & eGFR (annually) *same visit
- Retinal Eye Exam (annually)
- Statin Therapy

For Hypertensive Patients

- Complete blood pressure check + use CPTII codes to report values
- In control: < 139/89
- Statin therapy

Review Immunization Status

Colorectal Screening Age 45 - 75

- Colonoscopy every 10 years or
- Flexible sigmoidoscopy every 5 years or
- Cologuard every 3 years or
- FOBT yearly

Female Patient Screenings

- Breast Cancer Screening/Mammogram: Age 50-74 (every 27 months)
- Cervical Cancer Screening: Age 21-64 (every 3 or 5 years)
- Chlamydia Screening: Age 16-24 (annually if sexually active or have a claim for birth control)

**See your Quality Detail Guide for exclusions

Quick Reference CPTII codes

A1c Value Indicators

- 3044F – A1c < 7.0%
- 3051F – A1c > 7.0% - < 8.0%
- 3052F – A1c > 8.0 % <9.0%

Blood Pressure Value Indicators

- 3074 < 130 mm systolic
- 3075 130 -139 mm systolic
- 3077 > 140 mm systolic
- 3078 < 80 mm diastolic
- 3079 80 – 89 mm diastolic

Pediatric Quality Reference Card:

Childhood & Adolescent Immunizations

Is the patient up to date on the following vaccines?

METRIC NAME		VACCINE COMPONENTS	# OF DOSES	BY WHEN
COMBO 3	COMBO 10	DTap	4	AGE 2
		IPV	3	
		MMR	1	
		HiB	3	
		Hep B	3	
		VZV	1	
		PCV	4	
		Rotavirus	2 or 3	
		Hep A	1	
		Influenza	2	
COMBO 2		Meningococcal	1	AGE 13
		Tdap	1	
		HPV	2 or 3	

Other Quality Metrics

Is the patient up to date on wellness appointments?

- **Children ages 0-15 months:**
Complete 6 or more well-child visits before 15 months of age
- **Children 15-30 months:**
Complete 2 or more well-child visits 15 and 30 months of age
- **Children & Adolescents ages 3-21 years:**
Complete annual well-care visit with PCP or OB/GYN

When possible consider adding wellness visit to a sick/acute visit

Chlamydia Screening

Females aged 16-24 (annually if sexually active or have a claim for birth control)
